ENDICOTT GP TESTING
LABORATORY

Mr. J. L. Pokoski

May 24, 1962

SUBJECT: Hypertape Attachment to the 1401 System

Mr. L. K. Seith, of the Poughkeepsie Testing Laboratory, needs a detailed technical description of the 1401 I/O functions and related data flow and timings for Hypertape operation. In addition, he must know the areas in which the 1401 I/O does not conform to the Corporate Simplex Interface Definition.

The above information is required to complete the test procedure for the 1401-7641 evaluation. Because the Development Test of the subject feature was started on April 25, 1962, I must stress the importance of getting this information to Mr. Seith as soon as possible.
