MEMORANDUM TO: Mr. P. Farbanish
SUBJECT: "Transfer Program" Codes
REFERENCE: Memo to 1401 Files - "Transfer
Program" Codes 11 May 1959 -

Attached is a logic diagram which is intended to indicate the manner in which the compare circuit is to operate. I believe that it is essentially correct, with the possible exception of the compare latch - additional control is required to take care of unequal length fields.

Please investigate and incorporate the best design into the release design.
